HOPI EAR CANDLING TREATMENT DEVELOPS THE KNOWLEDGE AND SKILLS THAT LEARNERS NEED TO PERFORM AS PROFESSIONALS

The VTCT Level 2 Award in Thermal Auricular Therapy is a specialist vocationally related qualification. It has been specifically designed to help develop your basic knowledge, practical skills and competencies in how to provide ear candling treatments on clients. Ear candling involves lighting one end of a hollow candle and placing the other end in the ear canal.

The qualification is most suited to learners who wish to progress towards a

career as a complementary therapist or beauty therapist. The units cover these themes: health and safety practices, client care & communication and how to carry out safe and hygienic ear candling working methods.

The purpose of this qualification is to develop your skills and knowledge which may allow you to progress to a larger course of learning leading to a certificate or diploma qualification.
